(a) how well does each method rank its own errors?
USGLoc (ours): σ_t (43×)
SplatHLoc: inliers (8×)
ACE: inliers (7×)
median error, relative to the method's most-confident decile
10^1
10^0
1 2 3 4 5 6 7 8 9 10
decile of the method's own reported confidence
(1 = most confident)
(b) ours is a metric covariance (cm), not a unitless score
error = 1σ
3σ
actual error (cm)
10^3
10^2
10^1
10^0
10^{-1}
10^{-1} 10^0 10^1 10^2 10^3
reported 1σ translation uncertainty (cm)
